

KEIM

KEIM. COLOUR YOUR SCHOOL

DESIGN HEALTHY, SAFE AND SUSTAINABLE LEARNING
AND LIVING SPACES - NATURALLY MINERAL

KEIM. COLOURS PROVIDE A PLEASANT AMBIENCE

We only wish the best for our children inclusive a good education and healthy live. For this reason, constructions for children are a specific challenge. Whether kindergarten or school, the buildings must not only meet functional requirements, but also provide a healthy, sustainable and pleasant surrounding for playing, learning and living.

Facade design with most various materials, individual colour schemes or energetically optimised with a thermal insulation system play as much a role, as the indoor climate inside the buildings

KEIM. PAINTS WITH AN ADDED VALUE

For more than 140 years, the principle of sustainability has shaped KEIM's entrepreneurial activities and we have been committed for decades to developing and manufacturing healthy products. Already in 1983 we were the first company worldwide who launched a healthy-living interior paint and later received the first natureplus-certification for exterior paints.

Especially for sensitive and at the same time heavily used and frequented areas, such as schools and kindergartens, mineral products offer significant added value for buildings.

KEIM EXTERIOR PAINTS

Colour stability for decades

- Unequaled durability and colour stability
- Long-term clean facades
- Very economical and resource-saving thanks to reduced renovation intervals
- Mineral matt surface appearance and most diverse design possibilities
- Ideal moisture balance - avoids algae and fungi

KEIM WOOD SYSTEMS

World's first silicate paint for wood surfaces

- Highly weather resistant and durable
- UV stable and absolutely lightfast
- Easy to renovate
- Velvet-matt surface appearance
- Excellent moisture protection
- Particularly economical, ecological and sustainable

KEIM INTERIOR PAINTS

Healthy indoor climate - also suitable for allergy sufferers

- No solvents, plasticisers or preservatives added
- Non-toxic mould prevention thanks to optimal breathability
- No fogging active substances
- High abrasion and cleaning resistance - even under heavy load
- Safety even in case of fire - non-flammable, no development of toxic gases

KEIM ETIC SYSTEMS

Mineral plus for people, environment, facade

- Systems with mineral wool, mineral foam, polystyrene or wood fibre insulation panels
- Biocide-free prevention of algae and fungi
- Maximum fire protection with purely mineral systems
- Permeable - for a healthy indoor climate
- Hydroactive - dry faster, remain beautiful for a long time

Numerous quality seals prove our claim to ecologically sustainable and healthy products:
